

Potatoes from the « Heedhaff »

Farmer Pit picks the potatoes from the earth with his machine.

..we collect them...

..to put them in a bucket..

How and where do the potatoes grow?

It didn't stop raining....

Being quite wet, hungry and tired from working at the field, we fortified our body by drinking fresh milk produced at the farm and eating cake baked with wheat flour also from the farm.

Now we are rather dirty, but we enjoyed and it was quite interesting....
