

RESTENA

RESTENA Foundation (Réseau Téléinformatique de l'Éducation Nationale et de la Recherche) operates the high speed network for education and research in Luxembourg and is the national partner in the worldwide research and educational network community.

We have an immediate opening for a permanent full-time

Experienced Network Engineer (m/f)

The key duties include the deployment and maintenance of network equipment and systems, collaboration in defining and deploying future architectures, and enhancement of network monitoring.

Required qualifications:

- Good knowledge of CISCO environments
- Excellent knowledge of the usual networking protocols: Spanning Tree, OSPF, BGP, IPsec, IPv6....
- Good knowledge of Linux system-administration
- Solid understanding of information security

The candidate should be able to work autonomously. Good writing skills and effective learning capabilities are essential. Good command in speech and writing in English, French and/or German is required, in addition of which Luxembourgish would be a strong asset.

Applications are invited from university graduates in information technologies. We expect perseverance, creativity and communication skills to strengthen our team.

A motivation letter and curriculum vitae with copies of relevant certificates should be sent to:

Fondation RESTENA

Direction

2, avenue de l'Université

L-4365 Esch-sur-Alzette
